Painting on Canadian Angus skin

Painting on Canadian Angus skin

exclusiv by © judith brennwald, switzerland

August/September 2009 I'm starting a unique art work in Canada.

Initially the fur of tanned Angus skin is shaved within the area where the painting is to be. The skin is then stretched over the solid picture frame, where the artwork is completed by painting an Angus motive.

A vernissage followed by an exhibition is planned to be in the area of Calgary/Banff within the period of September 2009. The mentioned homepage below will frequently be updated with latest information and dates.
